Sent from my iPhone Thank you for the opportunity to participate in this survey and respond to your questions. 1 I presently serve on the orchard city planning committee and have lived in the community for a large portion of my life, and have seen many changes to the area. 2 I believe that these principles are sound and are excellent guidelines which to base decisions upon. 2b By first listening to the public and basing any decisions on the greater good of the community. Communication is the first step in any decision and must be allowed in all situations. Also dutiful research on all aspects is key to wise decisions. 2c I agree with the principles stated here. 3 I believe that the present board in orchard city has made sound and productive decisions. 4 Extremism in any form, whether right or left is not conducive to progress or solutions. It is a right to be passionate about one's feelings, but inciting civil unrest is not and should not be tolerated! 4b Inforce laws on the books that protect officials and prosecute offenders to the fullest extent of the law. 5 Yes it helps the elderly and working class to be able to be a part of the election process. 6 Yes there areas that I feel need to be addressed, but for the most part have done well. Those areas that I see that need attention are some of the reasons why I am running for the board. 6a That question is a challenge to answer without really studying all the different areas that pertain to my community. Certainly my community needs a better info structure based on the future growth of this area. 7 Water, Growth and services provided to this community. Growth even though enviable must not outstrip the resources available to sustain it, water being the primary source. I would like to see gradual progress and improvements on local roads and bridges and all peoples property rights respected throughout the community. I would work to improve the community way of life that would benefit all citizens and not just a select group. Thank you for allowing me to respond to this, I wish it could be done in a open forum where I could share my thoughts verbally, as I feel that I can convey my message better.
